Introduction

Coronavirus pandemic brought the economy of India to a halt over the past one year, and numerous people have lost their jobs, especially women. A recent study in Delhi found that in eight months, the unemployment rate in the national capital increased by 17%, with about 83% of women respondents choosing to permanently opt out of participating in the workforce. A similar trend has been observed throughout the country, and this at a time when the participation of women was already declining in the workforce with each passing year. As per Centre for Monitoring Indian Economy (CMIE) estimates, between mid-2016 and early 2020, the female labour participation rate, which is the percentage of women working out of all women falling in the working age, fell from 16.4% to about 11%. And now, it has been estimated that this number might have further been pushed this figure down to 9% due to the pandemic. CMIE data also stated that while women accounted for only about 10.7% of the total workforce in 2019-20, they formed about 13.9% of the job losses India witnessed in April 2020. What's worse is the fact that by the time November rolled about, while most men recovered their jobs, women did not have the same fate. "India's unemployment rate is 24.1% despite the 77% literacy rate – blame it on the ride year 2020 sent us on with the pandemic's emergence. Though the figures are discouraging, the creativity and the various fields the year brought to the forefront cannot be ignored. The past few years also pushed the mechanism of remote working, allowing people from all geographies to jump into the race and compete with the old players. Jobs in the Tech world like Artificial Intelligence and Robotics and others including Healthcare, Digital Marketing and Alternate Energy Sources will soon occupy the top heap of the available opportunities, thanks to the transformation these fields are bringing to the work landscape. A major change witnessed during these times is the upliftment of women and their participation in the workforce as key contributors. They have entered the scenario and are here to mark their permanent presence," said Abhinaya, the head of HR at Keka, a human resource management solutions company. Talking about the hopes for the future, Abhinaya said, "We are seeing a healthy trend in the hiring operations of organizations in many core sectors, especially Pharma, Manufacturing and service sectors like IT Services, Healthcare. Highly affected sectors like travel, hospitality are also hiring again (in certain niches) but overall aren't likely to reach their pre-covid levels."

FE Online also reached out to Great Learning, an edtech platform which is involved in training of professionals to prepare them for the workforce. Great Learning Co-Founder Hari Krishnan Nair said, "Despite the initial slump in the job market, there has been a huge jump in the country's hiring trends in the recent past. The pandemic-led digital shift created a massive demand for skilled professionals in domains like Business Analytics, Data Science, Machine Learning, Artificial Intelligence, Cybersecurity, Digital Marketing, & Design Thinking. Sectors like technology, BFSI, e-commerce, ed-tech, and logistics are hiring fresh and top-rated tech talent for roles in emerging technologies. The demand has been created with both Indian and MNC businesses that are increasingly gravitating towards digital technologies to remain competitive amidst the pandemic. As we are seeing an uptick in demand for these programs in emerging technologies, we believe that the top skills that will continue to be in demand in 2021 are Artificial Intelligence, Machine Learning, Data Science, Cloud computing, Digital Marketing, Data engineering, and Information security." He added, "While remote working has offered a lot of professionals more flexibility to strike a work-life balance, the lockdown has specifically been beneficial for the female workforce and pushed them to continue their jobs and upskill instead of opting out due to various domestic constraints. Over the past year, we have seen an increase in the number of enrolments by female learners across all technical programs. In fact in the past year, a number of companies including AGS Health, Diageo, Nielsen, OCWEN, Maersk among others have collaborated with Great Learning as their preferred diversity hiring partner. The focus is to make more opportunities available for women learners in leading organizations. I believe that this

Introduction

Today CSR isn't optional and taking a state of the board rule as key basic which is bit by bit spreading over all organizations in India paying little heed to part or size. Corporate social duty (CSR) is an umbrella term for corporate obligation, corporate citizenship, mindful business and corporate social open door whereby associations think about the interests of society by assuming liability for the effect of their exercises on clients, providers, workers, investors, networks and different partners, just as the earth. This commitment supposedly extends past the statutory commitment to follow enactment and sees associations willfully finding a way to improve the personal satisfaction for workers and their families just as for the neighborhood network and society on the loose.

In the year 2010, there have been such a large number of talks, reviews, symposiums, gatherings and research work distributed about CSR, Business morals, societal advertising, cause activity, preservation, practice environmental safety..... ....and supportability. This all has set the phase of CSR advance in the duty and maintainability space in India.

Taking a gander at the current worldwide money related emergency and monetary state of India, CSR must be in light of a legitimate concern for continued long haul development taking a key shape to convey social change. Financial specialists Michael Porter and Mark Kramer make a qualification among "responsive" and "key" CSR. The first depends on "great citizenship" and attempting to alleviate hurt from esteem chain exercises. These activities depicted above are nearly sine qua non states of CSR, and hence another progression is required. Henceforth the second sort of CSR, "key," involves bit by bit changing quality chain exercises to profit society while strengthening system. In the event that the organization puts resources into social angles that reinforce organization intensity, it will make shared esteem. A cooperative relationship builds up the accomplishment of the organization and the achievement of the network become commonly fortified. The present emergency requires vital CSR to handle the rising need that present financial downturn is probably going to bring. Here is when organization needs to go an additional mile to tie key CSR program with its center skills, which implies, CSR exercises need to help those in need the most to modify their lives and trust in Business.

Supportability isn't constrained to a "green" product offering, well meaning plans or a noteworthy showcasing effort. Maintainable improvement must be assessed from alternate points of view to guarantee that it is satisfying the current needs without bargaining future ages' odds of satisfying their own needs. Organizations that work it into their business procedures will have a higher possibility of being supportable. This high relationship between's venture potential and obligation has prompted the presence of specific undertakings that incorporate maintainability as a speculation benchmark, for example, the Dow Jones Sustainability Index (DJSI) or the Carbon Disclosure Project. However, there have been a few approach producer activities, confirmations of a change in perspective from philanthropy to a long haul technique and corporate reports on giving guidance to CSR in India presently yet at the same time there is a need key job on CSR, an attitudinal change in individuals about the idea by having progressively cognizant and ethically determined talks on CSR,' composed Swati Piramal, president, ASSOCHAM, in CSR report 2010. In spite of real advancement in CSR, there is as yet a lengthy, difficult experience ahead as far as connecting socially capable undertakings to the association's procedure.

Without a doubt a few NGOs, government associations and Public-private organization are the rising networks taking deliberate activities for CSR viability in India yet this is beyond the realm of imagination without organizations move towards key CSR. Organizations are known as the shaper of society and opportunity has arrived when organizations can demonstrate it by reasonable activities through key CSR. This prepares where vital CSR can fill in as a component of change, incorporating the multifaceted nature and pressures of the unique and crossing measurements of divisions, levels, and structure that give the setting inside which CSR is arranged.

Vital CSR through supportable activities gives continuous customization instead of without vision and

PART B: ACADEMIC PERFORMANCE INDICATORS (API):

Based on the teacher's self-assessment, API scores are proposed for (1) teaching related activities; domain knowledge; (2) Involvement in University / College student's related activities / research activities. The minimum API score required by teachers from this category is different for different levels of promotion. The self- assessment score should be based on objectively verifiable records. It shall be finalized by the Screening Cum Evaluation / Selection Committee. University may detail the activities, in case institutional specificities require, and adjust the weightages without changing the minimum total API scores required under this category.

PART B: ACADEMIC PERFORMANCE INDICATORS (API):

Based on the teacher's self-assessment, API scores are proposed for (1) teaching related activities; domain knowledge; (2) Involvement in University / College student's related activities / research activities. The minimum API score required by teachers from this category is different for different levels of promotion. The self- assessment score should be based on objectively verifiable records. It shall be finalized by the Screening Cum Evaluation / Selection Committee. University may detail the activities, in case institutional specificities require, and adjust the weightages without changing the minimum total API scores required under this category.
